

Quarter 1 Project Proposal

I. Project Title

Homework Hero: The Simple Task & Quiz Tracker

II. Problem Statement

Many students like me often forget when our homework, quizzes, and project deadlines are due. With so many different subjects every day, it is easy to lose track of assignments, what leads to late submissions, lower grades, and last-minute stress. This problem is important to solve because learning how to manage time early on helps students perform better in school and feel less overwhelmed.

III. Project Objectives

1. **Specific:** Create a simple command-line interface (CLI) tool that lets students input, view, and mark their daily school assignments as done.
2. **Measurable & Attainable:** Successfully build a basic working script that can store and display at least 10 items without crashing.
3. **Time-bound:** Finish writing and testing the pseudocode and project outline within 1 week for Quarter 1 submission.

IV. Planned Features

- **Add Assignment:** Allows the user to type in a task name, subject, and due date.
- **View List:** Displays all current homework items in a simple organized list.
- **Mark Complete:** Lets the user mark an assignment as "Done" so they know they do not need to work on it anymore.
-

V. Planned Inputs and Outputs

- **Inputs:**
 1. Choice number from the main menu (1, 2, 3, or 4)
 2. Name of the assignment (e.g., "Math ILA")
 3. Subject name (e.g., "Science")
 4. Due date (e.g., "Friday")
- **Outputs:**
 1. Main menu options printed on screen
 2. Confirmation message (e.g., "Assignment saved successfully!")
 3. Formatted list showing all saved assignments and their completion status

Quarter 1 Project Proposal

VI. Logic Plan

Pseudocode

START

Set assignmentList to empty

Loop forever:

Display Menu:

1. Add New Assignment
2. Show My Assignments
3. Mark Task as Done
4. Exit

Ask user to enter choice

If choice is 1:

Ask user for task name

Ask user for subject

Ask user for due date

Save task name, subject, due date, and set status to "Pending" in assignmentList

Print "Successfully saved"

Else if choice is 2:

If assignmentList is empty:

Print "You have no homework right now!"

Else:

For each assignment in assignmentList:

Print task name, subject, due date, and status

Else if choice is 3:

If assignmentList is empty:

Print "Nothing to complete!"

Else:

Ask user which task number to finish

Change status of that task to "Done"

Print "Updated task to Done!"

Else if choice is 4:

Print "Bye! Don't forget your homework!"

Stop program

Quarter 1 Project Proposal

Else:

Print "Invalid option, try again."

END
